

The service that never sleeps™

NightOwl™ Managed Services for JDE EnterpriseOne

Your company's data is its most valuable asset. If you want world-class Oracle database management, DBConnect is the solution.

NightOwl™ Monitoring & Messaging

The NightOwl™ Monitoring & Messaging engine never sleeps. Our tools monitor your JDE Oracle database 24 hours per day, 365 days per year. The health of your database is proactively sent to DBConnect's Database Administration team so we can prevent problems before they ever impact the operation of your system. The tools are specifically engineered for JDE so we can address the unique ways that JDE interacts with the Oracle database.

NightOwl™ Health Check for Oracle JDE

The NightOwl™ Health Check for Oracle JDE is an automated report that compares your JDE Oracle database against our set of Best Practices. The health check reviews security, architecture/topology, backup/recovery, and JDE-specific areas, and produces web-based and PDF reports for your review. As a DBConnect customer, you have access to a repository of your reports on the DBConnect website.

NightOwl™ Database Refresh for Oracle JDE

The NightOwl™ Database Refresh for Oracle JDE is a fully-automated, parameter-driven Oracle database refresh tool that can be leveraged to make environment refreshes much more efficient and reliable. The tool also supports a "refresh with exception list" option to allow one environment to be refreshed to another while skipping certain key tables.

NightOwl™ Database Compression for Oracle JDE

The NightOwl™ Database Compression for Oracle JDE leverages compression in the database to reduce the size of a typical Oracle JDE database from anywhere between 50% - 90%, depending on the profile of the database. This results in reduced storage requirements and often results in significant improvements in performance.

Our focus on the JDE DBA function allows us to provide a level of service unavailable anywhere else. We have a set of world-class tools and processes, world-class management standards, and world-class JDE DBAs that we leverage across all of our clients. This allows us to deliver a compelling value proposition for our customers.

If you want world-class Oracle database management, DBConnect is the solution.

NightOwl™ Database Assured Recovery

We believe that any backup and recovery process ought to include a periodic validation of the recovery process. The NightOwl™ Database Assured Recovery includes periodic tests of your Oracle database backups to validate the entire backup and restoration process.

NightOwl™ JDE Database Security for Oracle JDE

The NightOwl™ Database Security for Oracle JDE ensures that your Oracle database is secure. By default, every JDE Oracle database grants PUBLIC access on all objects. NightOwl™ closes this security gap and ensures that it remains closed.
