

NightOwl™

The service that never sleeps™

NightOwl™ Health Check for Oracle JDE

DBConnect Solutions now provides you access to decades of Oracle JDE DBA expertise at the click of a button. Packaged within a single software solution and provided free on a trial basis, you can obtain an automated health check of your JDE Oracle database and know exactly where you need to focus your time and energy.

The NightOwl™ Health Check for Oracle JDE compares the operational metrics of your JDE database against a set of Best Practices we've developed over the last 25 years, from the earliest releases of the Oracle database, all the way through Oracle 11g R2 and beyond. Better still, the health check not only provides you with instant feedback about the health of your database, but it does it within the context of JDE EnterpriseOne.

We are *THE* experts in this field and we know with absolute certainty that well-architected and well-managed JDE Oracle databases save you time AND money. With NightOwl™ Health Check Oracle JDE, you can be assured that your database environment is as good as it can get.

Sample of Health Check Report

What Do We Analyze?

Security:

Your Oracle database is reviewed for issues such as PUBLIC grants, default database passwords, proper security settings for JDE, and Sarbanes-Oxley compliance settings.

Topology:

Your current database version is reviewed, along with tablespace and datafile architecture, and your init.ora parameters.

Backup and Recovery:

Your database backup settings are reviewed to determine if there are issues that would put the recoverability of your data at risk.

Performance:

The top SQL statements in your system are reported, along with database waits and locks. JDE-specific tuning opportunities are also analyzed.

JDE-Specific Items:

Items specific to JDE itself are reviewed, such as missing JDE indexes or constraints and excessive failed JDE jobs.

Results of health checks are available in PDF format or in a more detailed format on our web portal. Licensed customers can retain a history of health check results on the portal for future reference.

NightOwl™ Health Check for Oracle JDE is provided free on a trial basis to new customers, or it may be licensed.
